MRC's Workplace Safety Forum

Keeping your workplace safe from employee injuries and OSHA compliance is an everyday challenge. This challenge affects your Workers' Compensation rates and your overall cost of doing business.

MRC's workplace safety forum provides the opportunity to engage with an experienced Board-Certified Safety Professional and peer group for interactive discussion of challenges facing their organizations and sharing Best Practices to overcome those challenges.

Participants in MRC's Workplace Safety Forum will hear from an EHS Expert on specific topics regarding OSHA compliance, Emphasis Programs, and case studies from past incidents involving fatalities and injuries.

MRC's facilitator ensures the right balance of interactive discussion during planned activities and open discussion segments of the forum agenda. Participants should find the Workplace Safety forum a valuable investment in education and peer networking in order to solve your Risk Management challenges.

Our Partner

East Coast Risk Management
ECRM, specializes in Safety Consulting,

Human Resources Consulting, Claims Management, and DOT Compliance, with clients ranging from small and medium sized businesses to large, multi-national organizations. ECRM also has a relationship with Keystone Insurance Group, serving in part as their Risk Management Division. With eleven offices located throughout Pennsylvania, Ohio, Georgia, Indiana, Tennessee, Illinois and North Carolina, ECRM is capable of quickly responding to the specific needs of any size organization.

Each service that ECRM provides is results-oriented and its success is directly linked to the high level of success experienced by their clients. ECRM prides themselves on their reputation as a long-term, relationship-oriented partner, and their business partners see their dedication to their objectives. ECRM's 95% retention rate is the true testament to that success.

Peer Forum for safety professionals,
safety committee members, HR, and
those responsible for ensuring a safe work environment.
